(FOR ADDRESS ONLY.)

Sandstorm at the Pyramids. Egypt was already ancient when Rome and the oldest cities of Europe were in their infancy, and among the monuments of Egypt, "hoary with tradition," the Pyramids are the most interesting. These colossal tombs stand up, dominating the flat Egyptian fields, with immovable stability through all past centuries and through all convulsions that the world can know unto the end of time.

29 DEC 15

Charlie & I will come to morrow, but don't know at what time.
